Subject: Online Application System Update

The online employment application system is now back up and working.   We believe all system problems have been resolved; however, we will continue to monitor the system over the next few weeks and make necessary adjustments if needed.

While down the applicant system was able to capture the email addresses of those applicants who tried unsuccessfully to log into the system and apply for jobs. These applicants will be receiving an email advising them that the system is up and that they can reapply. We will also be extending the posting time for the jobs that were posted during the applicant system outage. These jobs will be posted a minimum of 7 days.

Ad posting request received for jobs while the system was down are being posted as quickly as possible.

We appreciate your patience with during this time and look forward to working with you in the future.

Thanks,

Pamela Anderson

Subject: Online Application System

Some of you may be aware that our online application system has been offline since Saturday. We have been working with IT to resolve this issue as soon as possible and are hopeful that it will be back up later today or at the latest tomorrow.

For departments that have current postings or have requested a position to be posted – we will be extending the end dates to compensate for the time that it has been down so all of our applicants will have ample time to apply for your positions. If your position was scheduled to close on the 14th of December your qualified applicant list is ok to run. If your position was scheduled to close after December 14th please do not run your qualified applicant list until after the new close date has been established.

We will send out another email at the time we have it back online.

If you have any questions please email AskRecruitment@uams.edu
